
We congratulate Messrs. A. V. Roe & Co. Ltd. on the completion of 25 years of successful aircraft design and construction.

We are proud to know that our **'CELASTOID'-NOVELLON'** clear sheetings (cut panels and formed parts) have contributed in some measure to that success: and that 'Avro' continue to give our products a high place in their confidence.

'Novellon' quality clear sheeting is a live factor in successful aircraft design and construction because—

It is clear it is tough
